Find the Error

Grade 6 · 6.RP.1

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

There are 3 red beads and 5 blue beads. What is the ratio of red to blue? Student's answer: 5:3

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Grade 6 · 6.RP.1

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

A class has 4 cats and 6 dogs as pets. Write the ratio of cats to dogs in simplest form. Student's answer: 4:6

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

A recipe uses 2 cups of flour for every 3 cups of sugar. Student says: For every 3 cups of flour, there are 2 cups of sugar.

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

A car drives 180 miles in 3 hours. What is its unit rate in miles per hour? Student's answer: 3

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Five pounds of apples cost $15. What is the price per pound? Student's answer: $10

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Grade 6 · 6.RP.2

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Which is the better buy: 8 cans for $6 or 5 cans for $4? Student says: 5 cans for $4

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Grade 6 · 6.RP.3

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

3 bags cost $9 and 5 bags cost $15. What is the cost of 10 bags? Student's answer: $25

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

What is 25% of 60? Student's answer: 6

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Grade 6 · 6.RP.3

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

On a map, 1 inch equals 40 miles. How many miles are 2.5 inches? Student's answer: 80 miles

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Grade 6 · 6.NS.1

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Divide $\frac{2}{3} \div \frac{1}{4}$. Student's answer: $\frac{1}{6}$

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Divide $\frac{3}{4} \div 3$. Student's answer: $\frac{9}{4}$

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Divide $\frac{5}{6} \div \frac{2}{3}$. Student's answer: $\frac{5}{9}$

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Divide 4.8 ÷ 0.6. Student's answer: 0.8

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Divide 12.6 ÷ 0.7. Student's answer: 1.8

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Divide 36.75 ÷ 2.5. Student's answer: 1.47

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Add 3.25 + 4.8. Student's answer: 7.13

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Subtract 9.4 - 2.67. Student's answer: 7.73

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Multiply 2.5 × 4.6. Student's answer: 115

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Find the greatest common factor of 24 and 36. Student's answer: 6

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Find the least common multiple of 6 and 8. Student's answer: 48

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Use the distributive property: $4(3 + 5)$. Student's answer: 17

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

The temperature is -5°C. It rises 8 degrees. What is the new temperature? Student's answer: -13°C

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

A bank account has $50. A withdrawal of $80 is made. What is the new balance? Student's answer: $30

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Which is less: -3 or -7? Student's answer: -3

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

What is the opposite of $\frac{7}{2}$? Student's answer: $\frac{2}{7}$

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

In which quadrant is the point (-3, 4)? Student's answer: first quadrant

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

The point (2, -5) is reflected across the y-axis. What is the new point? Student's answer: (2, -5)

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

What is the absolute value of -9? Student's answer: -9

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Order these numbers from least to greatest: -2, 1, -5, 0. Student's answer: -2, -5, 0, 1

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Is -4 greater than |-6|? Student says: Yes

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Find the distance from (0, 0) to (0, 7). Student's answer: 0

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Find the distance between (2, 3) and (8, 3). Student's answer: 5

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Find the distance between (-4, 1) and (3, 1). Student's answer: 4

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Evaluate 4^3. Student's answer: 12

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Evaluate 2^5. Student's answer: 10

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Evaluate $3 + 2^2$. Student's answer: 25

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Write an expression for: 5 less than 3 times n. Student writes: 5 - 3n

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Evaluate 2a + 3b when a = 4 and b = 5. Student's answer: 14

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Evaluate $x^2 - 4$ when $x = 5$. Student's answer: 1

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Expand $3(x + 4)$. Student writes: $3x + 4$

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Simplify 5x + 2x + 7. Student writes: 10x + 7

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Grade 6 · 6.EE.3

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Factor 12 + 8x using the greatest common factor. Student writes: 2(6 + 4x)

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Are $2(x + 3)$ and $2x + 3$ equivalent? Student says: Yes

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Are $4(x + 2)$ and $4x + 8$ equivalent? Student says: No

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Which expression is equivalent to 3(2x + 3)? Student says: 6x + 3

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Is x = 4 a solution of x + 7 = 11? Student says: No

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Is $x = 3$ a solution of $2x > 8$? Student says: Yes

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Is $x = 5$ a solution of $3x < 12$? Student says: Yes

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Tickets cost $8 each. Write an expression for the cost of n tickets. Student writes: n + 8

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Grade 6 · 6.EE.6

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Sam is 4 years older than Ann. Let a be Ann's age. Write an expression for Sam's age. Student writes: a - 4

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Grade 6 · 6.EE.6

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Ben has x marbles and gives away 5. Write an expression for how many he has left. Student writes: 5 - x

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Solve x + 9 = 14. Student's answer: 23

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Solve 4x = 36. Student's answer: 32

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Grade 6 · 6.EE.7

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Solve $x \div 5 = 7$. Student's answer: 12

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Write an inequality for: x is greater than 5. Student writes: $x < 5$

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Write an inequality for: at most 12 students. Student writes: n < 12

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Grade 6 · 6.EE.8

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Solve $x - 4 > 3$. Student's answer: $x > -1$

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Grade 6 · 6.EE.9

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

The cost C is 5 times the hours t. Which variable is independent? Student's answer: C

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Grade 6 · 6.EE.9

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

A car travels d = 60h miles in h hours. Which is the dependent variable? Student's answer: h

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Grade 6 · 6.EE.9

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

A plant's height is h = 2 + 3w inches after w weeks. Which is the independent variable? Student's answer: h

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

A triangle has a base of 10 and a height of 6. What is its area? Student's answer: 60

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

A parallelogram has a base of 8 and a height of 5. What is its area? Student's answer: 26

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

A trapezoid has bases of 6 and 10 and a height of 4. What is its area? Student's answer: 64

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Find the volume of a box that is $\frac{1}{2}$ unit long, 3 units wide, and 2 units tall. Student's answer: 5.5 cubic units

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Find the volume of a box that is $2\frac{1}{2}$ units long, 2 units wide, and 3 units tall. Student's answer: 7.5 cubic units

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Find the volume of a cube with edges of $\frac{1}{2}$ foot. Student's answer: $\frac{1}{4}$ cubic foot

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Grade 6 · 6.G.3

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

A square has vertices at (0, 0), (4, 0), (4, 4), and (0, 4). What is its side length? Student's answer: 16

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

A triangle has vertices at (0, 0), (6, 0), and (0, 8). What is its area? Student's answer: 14

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

A rectangle has vertices at (1, 1), (5, 1), (5, 3), and (1, 3). What is its perimeter? Student's answer: 8

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Grade 6 · 6.G.4

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Find the surface area of a cube with edges of 3 cm. Student's answer: 36 square cm

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Find the surface area of a box that is 2 by 3 by 4 units. Student's answer: 26

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Grade 6 · 6.G.4

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Find the surface area of a box that is 5 by 2 by 1 inches. Student's answer: 17

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Is 'How many pets does each student in our class have?' a statistical question? Student says: No

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Is 'What color is the teacher's shirt today?' a statistical question? Student says: Yes

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Is 'How long does it take students to walk to school?' a statistical question? Student says: No

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Find the range of the data: 2, 4, 4, 6, 9. Student's answer: 9

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Grade 6 · 6.SP.2

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Find the median of 3, 5, 5, 7, 8, 10. Student's answer: 5

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Find the mean of 10, 12, and 14. Student's answer: 10

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Find the mean of 1, 2, 3, 4, and 15. Student's answer: 3

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

A set of 5 test scores has a mean of 7. Student's answer: The sum is 2

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Four numbers have a mean of 8. What is their sum? Student's answer: 2

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Grade 6 · 6.SP.4

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

A dot plot has 3 dots above the value 2 and 4 dots above the value 3. How many data values are there? Student's answer: 4

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Grade 6 · 6.SP.4

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

In a box plot, what does the line inside the box show? Student's answer: the mean

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

In a dot plot, what does each dot represent? Student's answer: the mean

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

A student says: For the data 8, 8, 8, the average is 8 and the spread is 0. Is the student correct?

Student says: No

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

Test scores are 70, 75, 80, 85, and 90. The median is 80. What is the range? Student's answer: 15

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.

Find the Error

Name: _____ Date: _____

Analyze the student's work below. Identify the error, then solve the problem correctly.

A data set has values mostly between 40 and 60, with one value at 100. Which best describes the shape? Student says: symmetric

1. What did the student do wrong? Why do you think they made this error?

2. Solve the problem correctly. Show all of your work.
