Find the Error

Grade 2 · 2.OA.1

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Maya has 45 stickers. She gets 18 more, then gives 12 away. How many now? Student's answer: 75

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student did not subtract the 12 stickers Maya gave away. The total is 45 + 18 − 12.**

Correct answer: **51 stickers**

Find the Error

Grade 2 · 2.OA.1

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Ben has 30 cards. He buys 25 more and then loses 9. How many now? Student's answer: 16

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student mixed up the steps. Ben buys 25 more first, so 30 + 25 = 55, then 55 - 9 = 46.**

Correct answer: **46 cards**

Find the Error

Grade 2 · 2.OA.1

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A store has 52 apples. 17 are sold, then 9 more are delivered. How many now? Student's answer: 26

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student did not add the 9 delivered apples. 52 - 17 = 35, then 35 + 9 = 44.**

Correct answer: **44 apples**

Find the Error

Grade 2 · 2.OA.2

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

8 + 7 = ? Student's answer: 14

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student gave a sum that is one too small. 8 + 7 is 15.**

Correct answer: 15

Find the Error

Grade 2 · 2.OA.2

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

13 - 6 = ? Student's answer: 8

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student subtracted one too few. 13 - 6 is 7.**

Correct answer: 7

Find the Error

Grade 2 · 2.OA.2

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

9 + 9 = ? Student's answer: 16

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student made an addition error. Doubling 9 gives 18.**

Correct answer: 18

Find the Error

Grade 2 · 2.OA.3

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Is 7 odd or even? Student's answer: even

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student said even. Seven cannot be split into two equal groups, so it is odd.**

Correct answer: **odd**

Find the Error

Grade 2 · 2.OA.3

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Is 12 odd or even? Student's answer: odd

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student said odd. Twelve can be split into two equal groups of 6, so it is even.**

Correct answer: **even**

Find the Error

Grade 2 · 2.OA.3

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Write 8 as the sum of two equal addends. Student's answer: 3 + 5

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The addends are not equal. 3 and 5 are different.**

Correct answer: **4 + 4**

Find the Error

Grade 2 · 2.OA.4

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

An array has 3 rows of 4 dots. Student's equation: 3 + 4 = 7

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student added the rows and columns. Repeated addition adds 4 three times.**

Correct answer: **4 + 4 + 4 = 12**

Find the Error

Grade 2 · 2.OA.4

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

An array has 5 rows of 2 dots. Student's equation: 5 + 2 = 7

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student added the rows and columns. Repeated addition adds 2 five times.**

Correct answer: **2 + 2 + 2 + 2 + 2 = 10**

Find the Error

Grade 2 · 2.OA.4

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

An array has 2 rows of 6 dots. Student's equation: 6 + 6 + 6 = 18

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student added three 6s, but there are only 2 rows.**

Correct answer: **6 + 6 = 12**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

How many hundreds, tens, and ones are in 364? Student's answer: 3 hundreds, 4 tens, 6 ones

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student mixed up the tens and ones. In 364 the tens digit is 6 and the ones digit is 4.**

Correct answer: **3 hundreds, 6 tens, 4 ones**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

How many hundreds are in 500? Student's answer: 5 tens

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student named the wrong place. The 5 is in the hundreds place.**

Correct answer: **5 hundreds**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Write 7 hundreds, 0 tens, and 2 ones as a number. Student's answer: 72

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student left out a place. The hundreds digit is 7, the tens digit is 0, and the ones digit is 2.**

Correct answer: **702**

Find the Error

Grade 2 · 2.NBT.2

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Count by 5s from 35. Student's work: 35, 40, 45, 55

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student skipped 50. Counting by 5s adds 5 each time.**

Correct answer: **35, 40, 45, 50, 55**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Count by 10s from 240. Student's work: 240, 250, 260, 280

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student skipped 270. Counting by 10s adds 10 each time.**

Correct answer: **240, 250, 260, 270, 280**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Count by 100s from 450. Student's work: 450, 550, 560, 660

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student counted by 10s after 550. Counting by 100s adds 100 each time.**

Correct answer: **450, 550, 650, 750**

Find the Error

Grade 2 · 2.NBT.3

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Write 342 in expanded form. Student's answer: 300 + 4 + 2

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student wrote 4 instead of 40. The 4 is in the tens place.**

Correct answer: **300 + 40 + 2**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Write 'five hundred six' as a numeral. Student's answer: 560

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student put the 6 in the wrong place. Five hundred six is 506.**

Correct answer: **506**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Write 805 in words. Student's answer: eighty-five

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student left out the hundreds. 805 has 8 hundreds.**

Correct answer: **eight hundred five**

Find the Error

Grade 2 · 2.NBT.4

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Compare 452 and 425. Student writes: 452 < 425

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student used the wrong symbol. 452 is greater than 425.**

Correct answer: **452 > 425**

Find the Error

Grade 2 · 2.NBT.4

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Compare 307 and 370. Student writes: 307 > 370

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student used the wrong symbol. 307 has fewer tens than 370, so it is less.**

Correct answer: **307 < 370**

Find the Error

Grade 2 · 2.NBT.4

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Compare 580 and 580. Student writes: 580 > 580

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student used the greater-than symbol for equal numbers.**

Correct answer: **580 = 580**

Find the Error

Grade 2 · 2.NBT.5

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

37 + 45 = ? Student's answer: 72

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student made an addition error. 37 + 45 is 82.**

Correct answer: **82**

Find the Error

Grade 2 · 2.NBT.5

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

64 - 28 = ? Student's answer: 44

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student subtracted the tens wrong. 64 - 28 is 36.**

Correct answer: 36

Find the Error

Grade 2 · 2.NBT.5

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

58 + 27 = ? Student's answer: 75

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student made an addition error. 58 + 27 is 85.**

Correct answer: **85**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

23 + 14 + 31 + 12 = ? Student's answer: 70

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student made an addition error. 23 + 14 + 31 + 12 is 80.**

Correct answer: **80**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

45 + 22 + 10 + 13 = ? Student's answer: 80

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student made an addition error. The total is 90.**

Correct answer: **90**

Find the Error

Grade 2 · 2.NBT.6

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

18 + 18 + 18 + 18 = ? Student's answer: 64

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student made an addition error. Four 18s make 72.**

Correct answer: 72

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

325 + 240 = ? Student's answer: 515

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student made an addition error. 325 + 240 is 565.**

Correct answer: 565

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

489 - 120 = ? Student's answer: 379

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student made a subtraction error. 489 - 120 is 369.**

Correct answer: **369**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

256 + 388 = ? Student's answer: 544

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student made an addition error. 256 + 388 is 644.**

Correct answer: 644

Find the Error

Grade 2 · 2.NBT.8

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

What is 100 more than 462? Student's answer: 472

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student added 10 instead of 100. The hundreds digit changes.**

Correct answer: **562**

Find the Error

Grade 2 · 2.NBT.8

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

What is 10 less than 305? Student's answer: 395

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student added 90 instead of subtracting 10.**

Correct answer: **295**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

What is 100 less than 710? Student's answer: 700

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student subtracted 10 instead of 100. 710 minus 100 is 610.**

Correct answer: **610**

Find the Error

Grade 2 · 2.NBT.9

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Student solves 36 + 27: 30 + 20 = 50, and 6 + 7 = 12, so the total is 62. Is this right?

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student added 6 + 7 wrong. 6 + 7 is 13, so the total is 63.**

Correct answer: **No. The total is 63.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Student solves 45 + 38: 40 + 30 = 70 and 5 + 8 = 12, so the total is 82. Is this right?

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student added 5 + 8 wrong. 5 + 8 is 13, so the total is 83.**

Correct answer: **No. The total is 83.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Student says 40 - 15 is the same as 15 - 40 because subtraction works in any order. Is this right?

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **Subtraction does not work in any order. Changing the order changes the answer.**

Correct answer: **No. 40 − 15 = 25, but 15 − 40 is not possible with whole numbers.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A pencil starts at the 1 inch mark and ends at the 6 inch mark. Student's answer: 6 inches

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student did not subtract the starting mark. 6 - 1 = 5 inches.**

Correct answer: **5 inches**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A book starts at the 0 mark and ends at the 9 cm mark. Student's answer: 8 cm

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student read the length one short. The book ends at 9, so it is 9 cm long.**

Correct answer: 9 cm

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A block starts at the 2 mark and ends at the 7 mark. Student's answer: 7 inches

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student did not subtract the starting mark. 7 - 2 = 5 inches.**

Correct answer: **5 inches**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A desk is 12 paper clips long and 6 erasers long. Student says: 'Paper clips are longer.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student got it backward. Fewer units means each unit is longer, so erasers are the longer unit.**

Correct answer: **Erasers are the longer unit.**

Find the Error

Grade 2 · 2.MD.2

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A rope measures 9 small cubes and 3 large cubes. Student says: 'The rope is longer with large cubes.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The rope is the same length. Only the number of units changes with unit size.**

Correct answer: **The rope is the same length. Large cubes are just bigger units.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Student says: 'The number of units is always the same, no matter what unit is used.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **A smaller unit needs more units to measure the same object, so the count changes.**

Correct answer: **No. Smaller units give a bigger number.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Estimate the height of a door in feet. Student's answer: 2 inches

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student used the wrong unit and size. A door is about 7 feet tall.**

Correct answer: **About 7 feet**

Find the Error

Grade 2 · 2.MD.3

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Estimate the length of a pencil in centimeters. Student's answer: 150 cm

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student overestimated. A pencil is about 15 cm long.**

Correct answer: **About 15 cm**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Estimate the height of a classroom door in inches. Student's answer: 3 inches

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student underestimated. A door is about 80 inches tall.**

Correct answer: **About 80 inches**

Find the Error

Grade 2 · 2.MD.4

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Ribbon A is 12 inches. Ribbon B is 7 inches. How much longer is A? Student's answer: 19

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student added the lengths. To find how much longer, subtract: 12 - 7.**

Correct answer: **5 inches**

Find the Error

Grade 2 · 2.MD.4

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Pencil 1 is 9 cm. Pencil 2 is 4 cm. How much longer is pencil 1? Student's answer: 13

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student added the lengths instead of subtracting.**

Correct answer: **5 cm**

Find the Error

Grade 2 · 2.MD.4

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Rope 1 is 25 cm. Rope 2 is 30 cm. How much longer is rope 2? Student's answer: 55

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student added the lengths instead of subtracting. 30 - 25 = 5.**

Correct answer: **5 cm**

Find the Error

Grade 2 · 2.MD.5

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A rope is 45 cm. The second rope is 27 cm longer. How long is the second rope? Student's answer: 18

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student subtracted, but the second rope is longer, so we add. 45 + 27 = 72.**

Correct answer: **72 cm**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A snake is 58 inches. A piece 13 inches long is cut off. How long is the rest? Student's answer: 71

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student added, but a piece was cut off, so we subtract. 58 - 13 = 45.**

Correct answer: **45 inches**

Find the Error

Grade 2 · 2.MD.5

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A jump is 36 inches. Then another jump is 24 inches more. What is the total? Student's answer: 12

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student subtracted, but the jumps are added together. 36 + 24 = 60.**

Correct answer: **60 inches**

Find the Error

Grade 2 · 2.MD.6

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Plot 16 on a number line from 0 to 20. Student places it at 6.

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student placed the number at the digit 6. On a number line, 16 is 16 units from 0.**

Correct answer: 16

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

On a number line, the student says 7 is at the 6th mark when counting 0 as the first mark.

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student counted the 0 as a mark, but the position of 7 is 7 units from 0.**

Correct answer: **7 units from 0**

Find the Error

Grade 2 · 2.MD.6

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A number line from 40 to 60. The student places 52 halfway between 40 and 60 at 45.

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student misplaced the midpoint. Halfway between 40 and 60 is 50.**

Correct answer: **50**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A clock shows 4:25. Student's answer: 4:20

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student read the minutes wrong. The minute hand is at 25 minutes.**

Correct answer: 4:25

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A clock shows 9:40. Student's answer: 9:08

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student read the minutes as 8 minutes. The minute hand is at 40 minutes.**

Correct answer: 9:40

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A clock shows 6:55. Student's answer: 6:50

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student read 50 minutes. The minute hand is at 55 minutes.**

Correct answer: **6:55**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

What is the value of 3 quarters and 2 dimes? Student's answer: 60 cents

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student counted 3 quarters as 60 cents. Three quarters is 75 cents, plus 20 cents from the dimes.**

Correct answer: **95 cents**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A snack costs 65 cents. A student pays with $1. What is the change? Student's answer: 45 cents

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student subtracted incorrectly. $1 is 100 cents, and 100 - 65 = 35 cents.**

Correct answer: **35 cents**

Find the Error

Grade 2 · 2.MD.8

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

What is the value of 4 dimes and 3 nickels? Student's answer: 43 cents

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student made an addition error. 4 dimes is 40 cents and 3 nickels is 15 cents, for 55 cents.**

Correct answer: **55 cents**

Find the Error

Grade 2 · 2.MD.9

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A line plot shows 5 X's at 4 inches and 3 X's at 5 inches. How many measured 5 inches? Student's answer: 5

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student read the number at 4 inches. There are 3 X's at 5 inches.**

Correct answer: 3

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A line plot has 5 + 3 + 2 X's. How many X's are there in all? Student's answer: 12

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student added wrong. 5 + 3 + 2 is 10.**

Correct answer: **10**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Student says the number of X's tells the length, not how many measurements there are.

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The X's show how many measurements there are at each length, and the length is shown on the number line.**

Correct answer: **No. Each X is one measurement.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A picture graph shows 3 pictures of apples. Each picture is 2 students. How many students?

Student's answer: 3 students

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student counted pictures, not students. Each picture stands for 2 students.**

Correct answer: **6 students**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A bar graph has a scale of 5. The bar reaches 3 marks. Student's answer: 3

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student read the marks, not the value. Each mark is worth 5, so 3 marks is 15.**

Correct answer: 15

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Dogs has 20 votes and cats has 15 votes. How many more chose dogs? Student's answer: 35

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student added the two numbers. The difference is 20 - 15 = 5.**

Correct answer: **5 more**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Draw a shape with 4 sides and 4 right angles. Student draws a triangle.

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student drew 3 sides. The shape needs 4 sides and 4 right angles.**

Correct answer: **A rectangle or square**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Draw a hexagon. Student draws a shape with 5 sides.

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student drew 5 sides. A hexagon has 6 sides.**

Correct answer: **A shape with 6 sides**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Draw a triangle with one right angle. Student draws a circle.

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **A circle has no sides or angles. The shape must be a triangle.**

Correct answer: **A triangle with one right angle**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A rectangle is partitioned into 3 rows of 4 squares. Student counts 7 squares.

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student counted the rows and columns, not all the squares. 3 times 4 is 12.**

Correct answer: **12 squares**

Find the Error

Grade 2 · 2.G.2

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A rectangle has 2 rows of 5 squares. Student counts 7 squares.

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student missed squares. 2 times 5 is 10.**

Correct answer: **10 squares**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A rectangle has 4 rows and 3 columns of squares. Student counts 4 squares.

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student counted the rows only. 4 times 3 is 12.**

Correct answer: **12 squares**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A circle is split into 3 equal parts. Student says: 'halves.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **Halves need 2 equal parts. Three equal parts are thirds.**

Correct answer: **thirds**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A rectangle is split into 4 equal parts. Student says: 'fifths.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **Four equal parts are fourths. Fifths need 5 equal parts.**

Correct answer: **fourths**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A shape is split into 2 equal parts. Student says: 'thirds.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **Two equal parts are halves. Thirds need 3 equal parts.**

Correct answer: **halves**
