Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Count by tens from 10 to 100. Student's work:

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student skipped 80. The student counted 70 to 90 without saying 80.**

Correct answer: **10, 20, 30, 40, 50, 60, 70, 80, 90, 100**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Count from 15 to 20. Student's work:

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **After 19, the student wrote 10 instead of 20. The student may think the tens digit comes back to 1.**

Correct answer: **15, 16, 17, 18, 19, 20**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Count by tens from 30. Student's work:

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student counted by ones instead of tens. The student kept adding 1 instead of adding 10.**

Correct answer: **30, 40, 50, 60, 70, 80, 90, 100**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Start at 34. Count on 4 numbers. Student's work:

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student started counting at 1 instead of counting on from 34.**

Correct answer: **35, 36, 37, 38**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Start at 58. Count on 3 numbers. Student's work:

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student included the starting number 58 in the count. Count on means say the numbers after 58.**

Correct answer: **59, 60, 61**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Start at 27. Count on 3 numbers. Student's work:

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **After 29, the student wrote 20 instead of 30. The student reset the tens digit.**

Correct answer: **28, 29, 30**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Write the numeral for fourteen. Student's work:

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student reversed the digits. The 1 in the tens place should come first.**

Correct answer: 14

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Write the numerals 11 to 15. Student's work:

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student wrote 51 for fifteen. The student reversed the digits.**

Correct answer: **11, 12, 13, 14, 15**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Write the numeral for seventeen. Student's work:

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student wrote 70 and mixed up the digits. The 1 in 17 goes in the tens place.**

Correct answer: 17

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Count the 5 cubes. Student says: 'one, two, three, four, four, five.' Answer:

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student said 'four' twice, so the count does not match one number per cube. The answer is right, but the count was not one-to-one.**

Correct answer: **Count each cube once: one, two, three, four, five. There are 5 cubes.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Count the 7 blocks. Student says 'one' through 'seven' but touches one block twice. Answer:

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student touched one block twice and counted an extra number. The last number said was seven.**

Correct answer: **7 blocks**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Count the 4 cups. Student says 'one, two, three, four.' Answer:

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student gave the number before the last count. The last number said is how many.**

Correct answer: 4

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Count the 8 dots, scattered. Student counts 'one' through 'eight' but skips one dot. Answer:

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student skipped one dot in a scattered arrangement. Touch each dot once to count all of them.**

Correct answer: 8

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Count the squares in 3 rows of 4. Student counts 1, 2, 3, 4, then 5, 6, and says 6. Answer:

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student stopped after two rows and did not count the third row.**

Correct answer: 12

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Count the 14 cars in a row. Student says 'one, two, ... twelve, fourteen.' Answer:

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student skipped thirteen in the count. The answer is right by luck, so the count needs to be fixed.**

Correct answer: **Say the numbers in order from one to fourteen. There are 14 cars.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Group A has 5 dots. Group B has 3 dots. Student's answer: 'Group A is less than Group B.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student reversed the comparison. Five is more than three, so Group A is greater.**

Correct answer: **Group A is greater than Group B (5 is greater than 3).**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Group A has 4 stars. Group B has 4 hearts. Student's answer: 'Not equal, the stars are bigger.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student compared the size of the objects, not the number. Both groups have 4.**

Correct answer: **The groups are equal (4 and 4).**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Group A has 7 blocks. Group B has 9 blocks. Student's answer: 'Group A has more.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student said Group A has more, but 7 is less than 9. Group B has more.**

Correct answer: **Group B has more (9 is greater than 7).**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Which is greater, 4 or 7? Student's answer: '4 is greater.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student picked the smaller number. Seven is greater than four.**

Correct answer: **7 is greater.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Which is less, 6 or 2? Student's answer: '6 is less.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student picked the larger number. Two is less than six.**

Correct answer: **2 is less.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Compare 8 and 5 with a symbol. Student writes: 8 < 5

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student used the wrong symbol. Eight is greater than five.**

Correct answer: 8 > 5

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Show 2 + 3 with a drawing. Student draws 2 circles and 2 more circles. Answer:

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student drew 2 and then 2 more instead of 3. The second group should have 3 circles.**

Correct answer: **Draw 2 circles and 3 circles. Together that is 5.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Write an equation for: 'There were 4 birds. Then 1 bird flew away.' Student writes: 4 + 1 = 5

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student used addition for a take-away story. When a bird flies away, the number goes down.**

Correct answer: **4 − 1 = 3**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Write an equation for: 'I have 3 apples and get 2 more.' Student writes: 3 - 2 = 1

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student subtracted. Getting more apples means adding.**

Correct answer: **3 + 2 = 5**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

There are 4 ducks. 3 more come. How many ducks now? Student's answer: 1

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student subtracted, but more ducks came, so we add.**

Correct answer: **7 ducks (4 + 3 = 7)**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

There are 6 cookies. 2 are eaten. How many cookies are left? Student's answer: 8

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student added, but cookies were eaten, so we take away.**

Correct answer: **4 cookies (6 − 2 = 4)**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

There are 5 kids on the bus. 2 get on. How many kids now? Student's answer: 3

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student subtracted, but kids got on the bus, so we add.**

Correct answer: **7 kids (5 + 2 = 7)**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Show 5 in two parts. Student's answer: 2 and 2

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The two parts add up to 4, not 5. The parts must add up to the whole.**

Correct answer: **2 and 3 (or 1 and 4)**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Decompose 7. Student's answer: 3, 4, and 1

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student used three parts. The problem asks for two parts, and the parts must add up to 7.**

Correct answer: **3 and 4 (or 2 and 5)**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Decompose 6. Student's answer: 4 and 1

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The parts add up to 5, not 6.**

Correct answer: **4 and 2 (or 3 and 3)**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

What number adds to 3 to make 10? Student's answer: 6

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **Three plus six is 9, not 10.**

Correct answer: **7 (3 + 7 = 10)**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

What number adds to 8 to make 10? Student's answer: 3

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **Eight plus three is 11, which is too many.**

Correct answer: **2 (8 + 2 = 10)**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

What number adds to 5 to make 10? Student's answer: 4

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **Five plus four is 9, not 10.**

Correct answer: **5 (5 + 5 = 10)**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

2 + 2 = ? Student's answer: 5

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student gave a total that is too big. Two and two make 4.**

Correct answer: 4

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

5 - 1 = ? Student's answer: 6

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student added instead of subtracting. Taking 1 away from 5 leaves 4.**

Correct answer: 4

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

3 + 1 = ? Student's answer: 2

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student gave a total that is too small. Three plus one is four.**

Correct answer: 4

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Write 14 as tens and ones. Student's answer: 4 tens and 1 one

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student swapped the tens and the ones. Fourteen has 1 ten and 4 ones.**

Correct answer: **1 ten and 4 ones**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Write 12 as tens and ones. Student's answer: 2 tens and 1 one

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student swapped the tens and the ones. Twelve has 1 ten and 2 ones.**

Correct answer: **1 ten and 2 ones**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Write 19 as tens and ones. Student's answer: 1 ten and 8 ones

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student wrote 18. Nineteen has 1 ten and 9 ones.**

Correct answer: **1 ten and 9 ones**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Describe a pencil with a measurable attribute. Student's answer: 'It is pretty.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **Pretty is an opinion, not a measurement. Length can be measured.**

Correct answer: **It is long or short.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Describe a bag of sand. Student's answer: 'It is heavy and blue.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **Blue is a color, not a measurement. Heavy is a measurable attribute (weight).**

Correct answer: **It is heavy or light.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Describe a desk. Student's answer: 'It is fun to sit at.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **Fun is not measurable. Length, height, and weight can be measured.**

Correct answer: **It is tall, wide, or heavy.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Pencil A is longer than Pencil B. Student's answer: 'Pencil B is longer.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student reversed the comparison. Pencil A is the longer one.**

Correct answer: **Pencil A is longer.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Which box is heavier, the small box or the big box? Student's answer: 'The small box is heavier.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student judged by size, not weight. A small box can be heavier than a big one.**

Correct answer: **Check by holding both. Size alone does not tell weight.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Which is taller, the tall book or the short book? Student's answer: 'The tall book is shorter.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student reversed the comparison. The tall book is taller.**

Correct answer: **The tall book is taller.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Sort 6 fruits: 3 apples, 2 bananas, 1 orange. Student's count: apples 3, bananas 2, oranges 3.

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student counted the oranges wrong. There is 1 orange.**

Correct answer: **Apples 3, bananas 2, oranges 1**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Sort shapes: 4 circles and 3 squares. Student puts 1 circle with the squares.

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student put a circle in the square group. The groups must match the shape names.**

Correct answer: **Circles: 4. Squares: 3.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Sort animals: 4 cats and 2 dogs. Student's answer: 'There are 6 cats.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student counted all animals instead of only the cats. The total of 6 includes the dogs.**

Correct answer: **4 cats and 2 dogs**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Describe a ball using a shape name. Student's answer: 'a square'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **A ball is round and not square. The shape name for a ball is sphere.**

Correct answer: **sphere**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Describe a door using a shape name. Student's answer: 'a circle'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **A door has four sides and corners. It is a rectangle.**

Correct answer: **rectangle**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Describe a clock face using a shape name. Student's answer: 'a triangle'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **A clock face is round with no corners. It is a circle.**

Correct answer: **circle**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A triangle is turned upside down. Student's answer: 'That is not a triangle.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **Turning a shape does not change its name. It still has 3 sides and 3 corners.**

Correct answer: **It is a triangle.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A big square and a small square. Student's answer: 'The big one is a rectangle.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **Size does not change the name. A big square still has 4 equal sides.**

Correct answer: **It is a square.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

A square turned like a diamond. Student's answer: 'It is a diamond, not a square.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **Turning a square does not change its name. It still has 4 equal sides.**

Correct answer: **It is a square.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Is a ball 2D or 3D? Student's answer: 2D

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **A ball has depth, so it is a solid shape. It is 3D.**

Correct answer: **3D**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Is a circle drawn on paper 2D or 3D? Student's answer: 3D

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **A drawn circle is flat and has no depth. It is 2D.**

Correct answer: **2D**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Is a cube 2D or 3D? Student's answer: 2D because it has squares.

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The squares are its faces, but the cube has depth. It is 3D.**

Correct answer: **3D**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Compare a square and a rectangle. Student's answer: 'Both have 4 equal sides.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **A rectangle has two pairs of equal sides, not four equal sides. Only a square has four equal sides.**

Correct answer: **A square has 4 equal sides. A rectangle has 2 pairs of equal sides.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

How many corners does a triangle have? Student's answer: 4

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student counted an extra corner. A triangle has 3 corners.**

Correct answer: 3

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Compare a cube and a sphere. Student's answer: 'Both have flat faces.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **A sphere is round and has no flat faces. Only the cube has flat faces.**

Correct answer: **A cube has flat faces. A sphere is round with no flat faces.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Make a square with straws. Student uses 3 straws.

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **Three straws do not close into a square. A square has 4 sides.**

Correct answer: **4 straws**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Draw a triangle. Student draws a shape with 4 sides.

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The student drew a four-sided shape. A triangle has 3 sides.**

Correct answer: **Draw a shape with 3 straight sides.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Draw a circle. Student draws a square with rounded corners.

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **The shape still has corners. A circle is round with no corners.**

Correct answer: **Draw a round shape with no corners.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Put 2 identical triangles together to make a bigger shape. Student's answer: 'A circle.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **Two triangles put together have straight sides, so they cannot make a circle.**

Correct answer: **A larger triangle or a rectangle, depending on how they fit.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Use 4 small squares to make a bigger square. Student's answer: 'A rectangle with 3 squares.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **Three squares do not make a square. The student used 3 squares, not 4.**

Correct answer: **Arrange the 4 squares in 2 rows of 2 to make a bigger square.**

Find the Error

Name: _____ Date: _____

Look at the student's work below. Decide whether it is right. If it is wrong, find the error and solve the problem correctly.

Put 2 rectangles side by side. Student's answer: 'A triangle.'

1. Did the student get it correct or incorrect? If they did it incorrectly, what did they do wrong?

2. Solve the problem correctly. Show all of your work.

The error: **Two rectangles side by side make a bigger rectangle, not a triangle.**

Correct answer: **A bigger rectangle.**
