Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Jake has 12 stickers. He gets 5 more. How many now? Student's answer: 7

Solve the word problem.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student subtracted, but Jake got more stickers, so we add.	**17 stickers (12 + 5 = 17)**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Maya had 15 crayons. She gave 6 away. How many are left? Student's answer: 21

Solve the word problem.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added, but Maya gave crayons away, so we subtract.	**9 crayons (15 - 6 = 9)**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

8 kids sit on a bench and 9 kids sit on the grass. How many in all? Student's answer: 1

Solve the word problem.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student subtracted, but the groups are put together, so we add.	**17 kids (8 + 9 = 17)**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Sam has 14 marbles. 4 are blue and the rest are red. How many are red? Student's answer: 18

Solve the word problem.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added 4 to 14. The red marbles are the part left after taking away the blue ones.	**10 red marbles (14 - 4 = 10)**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

A bus has 11 riders. 3 get off. How many are left? Student's answer: 14

Solve the word problem.

What did the student do wrong? Why do you think the student made this error?

The student added, but riders got off, so we subtract.

Solve the problem correctly. Show all of your work.

8 riders (11 - 3 = 8)

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Tom has 7 apples. Ana has 9 more apples than Tom. How many does Ana have? Student's answer: 2

Solve the word problem.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student subtracted, but Ana has more than Tom, so we add 9 to 7.	**16 apples (7 + 9 = 16)**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Kai has 4, 6, and 5 stickers in 3 packs. How many in all? Student's answer: 14

Add the three packs.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student made an addition error. 4 + 6 + 5 is 15.	**15 stickers**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

3 + 7 + 6 = ? Student's answer: 15

Solve the equation.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student counted wrong. 3 + 7 is 10, and 10 + 6 is 16.	**16**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

2 + 8 + 5 = ? Student's answer: 12

Solve the equation.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added 2 instead of 5 at the end. 10 + 5 is 15.	**15**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Lily picks 3 red, 4 blue, and 9 green flowers. How many in all? Student's answer: 15

Add the three groups.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student made an addition error. 3 + 4 + 9 is 16.	**16 flowers**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

4 + 4 + 4 = ? Student's answer: 16

Solve the equation.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added wrong. 4 + 4 is 8, and 8 + 4 is 12.	**12**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

6 + 6 + 6 = ? Student's answer: 12

Solve the equation.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added only two of the three numbers. All three 6s must be added.	**18**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Student says 4 + 8 = 12, but 8 + 4 = 11. Is this right?

Check the two addition facts.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student made an addition error. Changing the order of addends does not change the sum. 8 + 4 is also 12.	**No. 8 + 4 = 12, the same as 4 + 8.**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Student says 5 + 9 is different from 9 + 5 because the numbers switched. Is this right?

Does changing the order change the sum?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student thought switching numbers changes the total. The commutative property says both orders give the same sum.	**No. Both equal 14.**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Student says 8 - 2 is the same as 2 - 8. Is this right?

Is subtraction the same in any order?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student used the commutative property for subtraction. Subtraction does not work in any order. 8 - 2 is 6, but 2 - 8 is not possible with whole numbers.	**No. Subtraction does not change order.**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Student solves 4 + 6 + 5: 4 + 6 = 10, then 10 + 6 = 16. Answer:

Student's answer: 16

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added 6 instead of 5 in the last step.	**15**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Student solves 9 + 1 + 4: 'Let me add 10 + 9 + 4 = 23.' Answer:

Student's answer: 23

What did the student do wrong? Why do you think the student made this error?

The student counted the 9 twice. Make 10 with 9 + 1 once, then add 4.

Solve the problem correctly. Show all of your work.

14

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Student says 3 + 5 = 8, so 5 + 3 = 9. Is this right?

Check the two addition facts.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student made an addition error. 5 + 3 is also 8, the same as 3 + 5.	**No. 5 + 3 = 8.**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

? + 6 = 13. Student's answer: 19

Find the missing number.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added 6 and 13 instead of subtracting. The missing addend is 13 - 6.	**7**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

8 + ? = 15. Student's answer: 23

Find the missing number.

What did the student do wrong? Why do you think the student made this error?

The student added 8 and 15. The missing addend is 15 - 8.

Solve the problem correctly. Show all of your work.

7

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

? + 3 = 10. Student's answer: 13

Find the missing number.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added 3 and 10. The missing addend is 10 - 3.	**7**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

9 + ? = 14. Student's answer: 23

Find the missing number.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added 9 and 14. The missing addend is 14 - 9.	**5**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

? + 4 = 12. Student's answer: 16

Find the missing number.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added 4 and 12. The missing addend is 12 - 4.	**8**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

6 + ? = 15. Student's answer: 21

Find the missing number.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added 6 and 15. The missing addend is 15 - 6.	**9**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count on 2 to find 7 + 2. Student says 'seven, eight.' Answer:

Student's answer: 8

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student counted on only 1. Counting on 2 from 7 means saying 'eight, nine.'	**9**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count on 3 to find 5 + 3. Student says 'five, six, seven.' Answer:

Student's answer: 6

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student counted correctly to seven but answered 6. The answer is the last number counted.	**8**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count back 2 to find 9 - 2. Student says 'nine, eight, seven.' Answer:

Student's answer: 8

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student counted back correctly but gave the number before the last one. The answer is 7.	**7**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Find 6 - 1 by counting. Student says 'six, seven.' Answer:

Student's answer: 7

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student counted up instead of back. Subtracting 1 means counting back one number.	**5**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count on 4 to find 4 + 4. Student says 'four, five, six, seven.' Answer:

Student's answer: 7

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student counted on only 3 numbers. Counting on 4 from 4 goes to 8.	**8**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count back 3 from 10. Student says 'ten, nine, eight.' Answer:

Student's answer: 8

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student counted back only 2 numbers. Counting back 3 from 10 ends at 7.	**7**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Solve 9 + 6 by making 10: 9 + 1 = 10, then 10 + 4 = 14. Answer:

Student's answer: 14

What did the student do wrong? Why do you think the student made this error?

The student split 6 into 1 and 4, but it should be 1 and 5. Then 10 + 5 = 15.

Solve the problem correctly. Show all of your work.

15

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Solve 13 - 4 by using 10: 13 - 3 = 10, then 10 - 1 = 8. Answer:

Student's answer: 8

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student subtracted 4 but split it incorrectly. 13 - 3 = 10, then 10 - 1 = 9.	**9**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Solve 8 + 7 by making 10: 8 + 2 = 10, then 10 + 4 = 14. Answer:

Student's answer: 14

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student used 4 instead of 5. 7 = 2 + 5, so 10 + 5 = 15.	**15**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Solve 15 - 9 by using 10: 15 - 5 = 10, then 10 - 3 = 7. Answer:

Student's answer: 7

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student subtracted 3 instead of 4 after reaching 10. 9 = 5 + 4, so 10 - 4 = 6.	**6**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Solve 6 + 8 by making 10: 6 + 4 = 10, then 10 + 2 = 12. Answer:

Student's answer: 12

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student split 8 into 4 and 2. 8 = 4 + 4, so 10 + 4 = 14.	**14**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Solve 11 - 7 by using 10: 11 - 1 = 10, then 10 - 7 = 3. Answer:

Student's answer: 3

What did the student do wrong? Why do you think the student made this error?

The student subtracted 7 after already taking 1 away. Only 6 is left to take away, so 10 - 6 = 4.

Solve the problem correctly. Show all of your work.

4

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Is 4 + 3 = 7 true or false? Student's answer: false

True or false?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student said false. Both sides of the equal sign have the same value, 7.	**True**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Is 9 = 9 true or false? Student's answer: false

True or false?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student thought both sides had to look different. Both sides are the same, so the statement is true.	**True**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Is 5 + 2 = 8 - 1 true or false? Student's answer: false

True or false?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student did not compute both sides. 5 + 2 is 7 and 8 - 1 is 7, so the statement is true.	**True**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Is 6 = 3 + 2 true or false? Student's answer: true

True or false?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student said true. 3 + 2 is 5, not 6, so the two sides are not equal.	**False**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Is 10 = 10 + 0 true or false? Student's answer: false

True or false?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student thought adding 0 changes the value. Adding 0 keeps the number the same, so both sides are 10.	**True**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Is 8 + 4 = 7 + 5 true or false? Student's answer: false

True or false?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student did not compute both sides. Both sides equal 12, so the statement is true.	**True**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

? + 4 = 11. Student's answer: 15

Find the missing number.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added 4 and 11. The missing number is 11 - 4.	**7**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

9 - ? = 3. Student's answer: 12

Find the missing number.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added 9 and 3. The missing number is 9 - 3.	**6**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

? - 5 = 6. Student's answer: 1

Find the missing number.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student subtracted the wrong way. The missing number plus... we need a number that minus 5 gives 6, so add 5 to 6.	**11**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

12 = ? + 5. Student's answer: 17

Find the missing number.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added 12 and 5. The missing addend is 12 - 5.	**7**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

10 = 4 + ?. Student's answer: 14

Find the missing number.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added 4 and 10. The missing addend is 10 - 4.	**6**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

15 - ? = 9. Student's answer: 24

Find the missing number.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added 15 and 9. The missing number is 15 - 9.	**6**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count from 98 to 102. Student's work: 98, 99, 90, 91, 92

Fix the count.

What did the student do wrong? Why do you think the student made this error?

After 99, the student wrote 90 instead of 100. The student did not move to the next hundred.

Solve the problem correctly. Show all of your work.

98, 99, 100, 101, 102

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count from 109 to 113. Student's work: 109, 110, 111, 112, 210

Fix the count.

What did the student do wrong? Why do you think the student made this error?

The student wrote 210 instead of 113. The last number should be 113.

Solve the problem correctly. Show all of your work.

109, 110, 111, 112, 113

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count from 114 to 120. Student's work: 114, 115, 116, 117, 118, 119, 110

Fix the count.

What did the student do wrong? Why do you think the student made this error?

The student wrote 110 instead of 120. The student reset the tens digit.

Solve the problem correctly. Show all of your work.

114, 115, 116, 117, 118, 119, 120

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count from 49 to 53. Student's work: 49, 50, 51, 52, 42

Fix the count.

What did the student do wrong? Why do you think the student made this error?

The student wrote 42 instead of 53. After 52, the next number is 53.

Solve the problem correctly. Show all of your work.

49, 50, 51, 52, 53

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count from 99 to 104. Student's work: 99, 100, 101, 102, 103

Fix the count.

What did the student do wrong? Why do you think the student made this error?

The student stopped one number early and did not say 104.

Solve the problem correctly. Show all of your work.

99, 100, 101, 102, 103, 104

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count from 108 to 111. Student's work: 108, 109, 110, 112

Fix the count.

What did the student do wrong? Why do you think the student made this error?

The student skipped 111. After 110, the next number is 111.

Solve the problem correctly. Show all of your work.

108, 109, 110, 111

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Write 34 as tens and ones. Student's answer: 3 ones and 4 tens

34 = ? tens and ? ones

What did the student do wrong? Why do you think the student made this error?

The student swapped tens and ones. 34 has 3 tens and 4 ones.

Solve the problem correctly. Show all of your work.

3 tens and 4 ones

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

How many tens are in 57? Student's answer: 7

Count the tens.

What did the student do wrong? Why do you think the student made this error?

The student gave the ones digit. The tens digit in 57 is 5.

Solve the problem correctly. Show all of your work.

5 tens (and 7 ones)

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Write 80 + 6 as a number. Student's answer: 68

Write the number.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student wrote the 6 in the tens place. 80 + 6 is 8 tens and 6 ones.	**86**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Write 4 tens and 0 ones as a number. Student's answer: 4

Write the number.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student left out the tens. 4 tens is 40, so the 0 ones must be written.	**40**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Write 2 tens and 9 ones as a number. Student's answer: 92

Write the number.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student swapped the tens and ones. 2 tens and 9 ones is 29.	**29**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Write 100 as tens and ones. Student's answer: 10 tens and 1 one

100 = ? tens and ? ones

What did the student do wrong? Why do you think the student made this error?

The student added an extra one. 100 is 10 tens and 0 ones.

Solve the problem correctly. Show all of your work.

10 tens and 0 ones

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Compare 46 and 64. Student writes: 46 > 64

Use >, <, or =

What did the student do wrong? Why do you think the student made this error?

The student used the wrong symbol. 46 has fewer tens than 64, so 46 is less.

Solve the problem correctly. Show all of your work.

46 < 64

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Compare 73 and 37. Student writes: 73 < 37

Use >, <, or =

What did the student do wrong? Why do you think the student made this error?

The student used the wrong symbol. 73 has more tens than 37, so 73 is greater.

Solve the problem correctly. Show all of your work.

73 > 37

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Compare 58 and 58. Student writes: 58 > 58

Use >, <, or =

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student used the greater-than symbol for equal numbers.	**58 = 58**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Compare 29 and 31. Student writes: 29 > 31. Student says 9 is bigger than 1.

Use >, <, or =

What did the student do wrong? Why do you think the student made this error?

The student compared only the ones digits. Compare the tens first. 2 tens is less than 3 tens.

Solve the problem correctly. Show all of your work.

29 < 31

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Compare 90 and 82. Student writes: 82 > 90

Use >, <, or =

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student reversed the symbol. 9 tens is more than 8 tens.	**90 > 82**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Compare 65 and 56. Student writes: 65 = 56

Use >, <, or =

What did the student do wrong? Why do you think the student made this error?

The student said they are equal. The tens digits differ, so 65 is greater.

Solve the problem correctly. Show all of your work.

65 > 56

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Add 23 + 5 with a model. Student's answer: 25

Solve 23 + 5.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added 2 instead of 5. 23 + 5 is 28.	**28**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Add 40 + 16. Student's answer: 46

Solve 40 + 16.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added 40 + 6 and forgot the 10 in 16. 40 + 16 is 56.	**56**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Add 34 + 30. Student's answer: 37

Solve 34 + 30.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added 3 instead of 30. Add 3 tens to 34 to get 64.	**64**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Add 47 + 8 with a model: 47 + 3 = 50, then 50 + 4 = 54. Answer:

Student's answer: 54

What did the student do wrong? Why do you think the student made this error?

The student split 8 into 3 and 4 but then added 4 instead of 5. 50 + 5 = 55.

Solve the problem correctly. Show all of your work.

55

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Add 26 + 40. Student's answer: 46

Solve 26 + 40.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added 20 instead of 40. Add 4 tens to 26 to get 66.	**66**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Add 18 + 7. Student's answer: 17

Solve 18 + 7.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student did not make a ten. 18 + 2 = 20, then 20 + 5 = 25.	**25**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

What is 10 more than 34? Student's answer: 35

Find 10 more.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added 1 instead of 10. Adding 10 changes the tens digit.	**44**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

What is 10 less than 62? Student's answer: 61

Find 10 less.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student subtracted 1 instead of 10. Taking away 10 changes the tens digit.	**52**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

What is 10 more than 79? Student's answer: 80

Find 10 more.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added only 1. Ten more than 79 is 89.	**89**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

What is 10 less than 40? Student's answer: 39

Find 10 less.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student subtracted 1 instead of 10. Ten less than 40 is 30.	**30**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

What is 10 more than 56? Student's answer: 57

Find 10 more.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added only 1. Ten more than 56 is 66.	**66**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

What is 10 less than 100? Student's answer: 89

Find 10 less.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student subtracted too much. Ten less than 100 is 90.	**90**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

80 - 50 = ? Student's answer: 40

Subtract the tens.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student subtracted incorrectly. 8 tens minus 5 tens is 3 tens.	**30**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

90 - 40 = ? Student's answer: 60

Subtract the tens.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student subtracted 30 instead of 40. 9 tens minus 4 tens is 5 tens.	**50**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

60 - 20 = ? Student's answer: 20

Subtract the tens.

What did the student do wrong? Why do you think the student made this error?

The student subtracted incorrectly. 6 tens minus 2 tens is 4 tens.

Solve the problem correctly. Show all of your work.

40

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

50 - 50 = ? Student's answer: 5

Subtract the tens.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student kept the tens digit only from 5 and did not subtract. 5 tens minus 5 tens is zero.	**0**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

90 - 30 = ? Student's answer: 70

Subtract the tens.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student subtracted 10 instead of 30. 9 tens minus 3 tens is 6 tens.	**60**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

40 - 10 = ? Student's answer: 40

Subtract the tens.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student did not subtract. 4 tens minus 1 ten is 3 tens.	**30**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Put these pencils in order from shortest to longest: A (5 in), B (3 in), C (4 in). Student's answer: A, B, C

Order the pencils.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student did not compare the lengths correctly. B is shortest, then C, then A.	**B, C, A**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Ribbon A is longer than ribbon B. Ribbon B is longer than ribbon C. Student's answer: C is the longest.

Which ribbon is longest?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student reversed the order. C is the shortest because B is longer than C.	**Ribbon A is the longest.**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

rom longest to shortest: tall tree, short bush, medium fence. Student's answer: short bush, medium fence, t

Order from longest to shortest.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student listed the order from shortest to longest. Longest to shortest is tree, fence, bush.	**Tall tree, medium fence, short bush**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Which is longer: the desk or the chair? Student's answer: The desk is longer because it looks bigger.

Compare the lengths.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student guessed by looking. Compare the lengths directly, for example by lining them up at one end.	**Compare them directly, such as by lining them up at one end.**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Order 3 strips: 6 in, 2 in, 4 in from shortest to longest. Student's answer: 6, 4, 2

Order from shortest to longest.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student listed the order from longest to shortest. Shortest to longest is 2, 4, 6.	**2, 4, 6**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

A is shorter than B. B is shorter than C. Student's answer: A is longer than C.

Compare A and C.

What did the student do wrong? Why do you think the student made this error?

The student reversed the comparison. Since A is shorter than B and B is shorter than C, A is shorter than C.

Solve the problem correctly. Show all of your work.

A is shorter than C.

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

A pencil is 5 paper clips long. Student's answer: 4

How many paper clips long?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student did not count all of the paper clips. The pencil is 5 clips long.	**5**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

A line is 7 cubes long. Student counts 6 cubes. Answer:

Student's answer: 6

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student missed one cube when counting the length. The line is 7 units long.	**7**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

A ribbon is 9 paper clips long. Student's answer: 8, because the first clip is not counted.

How many paper clips long?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student did not count the first clip. Every unit counts toward the length.	**9**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Student lays 6 cubes end to end with gaps between them and says the length is 6. Correct length?

Measure with no gaps.

What did the student do wrong? Why do you think the student made this error?

The cubes have gaps, so the length is not measured correctly. Units must be placed end to end with no gaps or overlaps.

Solve the problem correctly. Show all of your work.

Place the cubes with no gaps, then count the units. Length is measured by the number of whole units.

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

A shoe is 6 cubes long and a hat is 4 cubes long. Student's answer: The shoe is 4 cubes long.

How many cubes long is the shoe?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student mixed up the lengths. The shoe is 6 cubes long.	**6 cubes**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Measure a strip with cubes. Student says it is 3 and a half cubes long.

Measure in whole units.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student used a part of a unit. This standard asks for a whole number of units, so the strip should be measured in whole cubes.	**Count whole cubes only, and line them up with no gaps.**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

The clock shows 3:00. Student's answer: 3:30

What time is it?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student read the half hour. The minute hand is on 12, so it is 3:00.	**3:00**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

The hour hand is on 7 and the minute hand is on 12. Student's answer: 12 o'clock

What time is it?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student read only the minute hand. The hour hand is on 7, so it is 7 o'clock.	**7 o'clock**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

The hour hand is on 4 and the minute hand is on 6. Student's answer: 6:00

What time is it?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student read the minute hand as the hour. The hour hand is on 4, and the minute hand on 6 means half past, so it is 4:30.	**4:30**

100

Find the Error

1.MD.3

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Write 9:30 on a digital clock. Student writes: 9:03

Write the time.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student switched the minutes and the hour. The number after the colon is 30 for half past.	**9:30**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

The clock shows half past 2. Student's answer: 2:05

Write the time.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student read 5 minutes. Half past means 30 minutes, so it is 2:30.	**2:30**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

The clock shows 11 o'clock. Student writes: 1:00

Write the time.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student read the wrong hour. The hour hand is on 11, so the time is 11:00.	**11:00**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

: 5 students like apples, 3 like bananas, 2 like grapes. Which fruit do most students like? Student's answer: b

Read the data.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student picked the wrong category. Apples has the most votes with 5.	**Apples (5 students)**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

A tally chart: dogs 4, cats 6, fish 1. How many cats? Student's answer: 4

Read the chart.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student read the dog count. The cat count is 6.	**6 cats**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

A chart: red 7, blue 5, green 3. How many more blue than green? Student's answer: 3

Compare the two numbers.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student gave the green count. The difference is 5 − 3 = 2.	**2 more**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

A bar graph: vanilla 8, chocolate 5, strawberry 6. Which flavor has the fewest? Student's answer: strawberry

Find the least.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student did not compare all three numbers. Chocolate has the fewest with 5.	**Chocolate (5)**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

A chart has 4, 2, and 3 in three groups. What is the total? Student's answer: 7

Find the total.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added wrong. 4 + 2 + 3 is 9.	**9**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

A chart: sunny 9, rainy 2, cloudy 5. Which category has the fewest? Student's answer: sunny

Find the least.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student picked the largest number. Rainy has the fewest with 2.	**Rainy (2)**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Student says a rectangle has 3 sides. Is this right?

Check the shape.

What did the student do wrong? Why do you think the student made this error?

The student counted the sides wrong. A rectangle has 4 sides.

Solve the problem correctly. Show all of your work.

No. A rectangle has 4 sides.

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Student says a triangle has 4 corners. Is this right?

Check the shape.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student counted the corners wrong. A triangle has 3 corners.	**No. A triangle has 3 corners.**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Student says a square can have 3 sides. Is this right?

Check the shape.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A square always has 4 equal sides. Three sides would make a triangle.	**No. A square has 4 equal sides.**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Student says a cube is a 2D shape. Is this right?

Check the shape.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A cube has depth, so it is a 3D shape. A 2D shape is flat.	**No. A cube is 3D.**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Student says a circle has corners. Is this right?

Check the shape.

What did the student do wrong? Why do you think the student made this error?

The student confused a circle with a polygon. A circle is round and has no corners.

Solve the problem correctly. Show all of your work.

No. A circle has no corners.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Student says a hexagon has 5 sides. Is this right?

Check the shape.

What did the student do wrong? Why do you think the student made this error?

The student counted wrong. A hexagon has 6 sides.

Solve the problem correctly. Show all of your work.

No. A hexagon has 6 sides.

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Put 2 squares together. Student says: 'It makes a triangle.'

What shape is made?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Two squares side by side make a rectangle. They do not make a triangle.	**A rectangle**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Build a cube from 4 squares. Student says: 'The cube is finished.'

Is the cube complete?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A cube has 6 square faces. Four squares are not enough.	**No. A cube needs 6 square faces.**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Make a hexagon from triangles. Student uses 5 triangles and says: 'It is a hexagon.'

How many triangles make a hexagon?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student used too few triangles. A hexagon made from triangles needs 6 triangles.	**6 triangles**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Make a rectangle from 4 squares. Student lines them up in one row and says: 'It is a square.'

What shape is it?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A row of 4 squares makes a rectangle, not a square. A square needs 2 rows of 2.	**A rectangle (a 1 by 4 row)**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Put 2 rectangles together. Student says: 'It makes a triangle.'

What shape is made?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Two rectangles put together make a bigger rectangle or a different four-sided shape, not a triangle.	**A bigger rectangle**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Make a cylinder from circles and a rectangle. Student uses 1 circle and says: 'It is finished.'

How many circles does a cylinder need?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A cylinder has 2 circles, one on the top and one on the bottom.	**2 circles and 1 rectangle**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Divide a rectangle into 2 equal parts. Student's drawing has one part much bigger than the other.

Are the parts equal?

What did the student do wrong? Why do you think the student made this error?

The student made two parts that are not the same size. Halves must be equal.

Solve the problem correctly. Show all of your work.

Make 2 parts that are the same size.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Divide a circle into 4 equal parts. Student draws 3 parts and says 'quarters.'

How many parts?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student made 3 parts. Fourths need 4 equal parts.	**4 equal parts (fourths)**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

A rectangle is cut into 4 pieces of different sizes. Student says: 'These are fourths.'

Are these fourths?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Fourths must be equal in size. These pieces are not equal.	**No. Fourths must be equal.**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Student says half of a shape is 1 out of 3 equal parts. Is this right?

Check the fraction.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Half means 1 of 2 equal parts. One of 3 parts is a third.	**No. A half is 1 of 2 equal parts.**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

A pizza is cut into 4 equal slices. Student says: 'Each slice is a third.'

What is each slice?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student counted the slices wrong. 4 equal slices are fourths, or quarters.	**Each slice is a fourth (quarter).**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Student says: 'Two halves make one fourth.' Is this right?

Check the fractions.

What did the student do wrong? Why do you think the student made this error?

The student mixed up the parts. Two halves make one whole, not one fourth.

Solve the problem correctly. Show all of your work.

No. Two halves make 1 whole.
