Find the Error

K.CC.1

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count by tens from 10 to 100. Student's work:

10, 20, 30, 40, 50, 60, 70, 90, 100

What did the student do wrong? Why do you think the student made this error?

The student skipped 80. The student counted 70 to 90 without saying 80.

Solve the problem correctly. Show all of your work.

10, 20, 30, 40, 50, 60, 70, 80, 90, 100

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count from 15 to 20. Student's work:

15, 16, 17, 18, 19, 10

What did the student do wrong? Why do you think the student made this error?

After 19, the student wrote 10 instead of 20. The student may think the tens digit comes back to 1.

Solve the problem correctly. Show all of your work.

15, 16, 17, 18, 19, 20

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count by tens from 30. Student's work:

30, 31, 32, 33, 34, 35

What did the student do wrong? Why do you think the student made this error?

The student counted by ones instead of tens. The student kept adding 1 instead of adding 10.

Solve the problem correctly. Show all of your work.

30, 40, 50, 60, 70, 80, 90, 100

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count from 67 to 72. Student's work:

67, 68, 69, 60, 61, 62

What did the student do wrong? Why do you think the student made this error?

After 69, the student went back to 60. The student reset the ones digit without moving to the next tens.

Solve the problem correctly. Show all of your work.

67, 68, 69, 70, 71, 72

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count from 88 to 93. Student's work:

88, 89, 80, 81, 82, 83

What did the student do wrong? Why do you think the student made this error?

After 89, the student went back to 80. The student did not move to the next group of ten (90).

Solve the problem correctly. Show all of your work.

88, 89, 90, 91, 92, 93

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count from 96 to 100. Student's work:

96, 97, 98, 99, 10

What did the student do wrong? Why do you think the student made this error?

The student wrote 10 instead of 100. The student stopped at the ones digit and did not write the hundred.

Solve the problem correctly. Show all of your work.

96, 97, 98, 99, 100

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Start at 34. Count on 4 numbers. Student's work:

1, 2, 3, 4

What did the student do wrong? Why do you think the student made this error?

The student started counting at 1 instead of counting on from 34.

Solve the problem correctly. Show all of your work.

35, 36, 37, 38

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Start at 58. Count on 3 numbers. Student's work:

58, 59, 60, 61

What did the student do wrong? Why do you think the student made this error?

The student included the starting number 58 in the count. Count on means say the numbers after 58.

Solve the problem correctly. Show all of your work.

59, 60, 61

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Start at 27. Count on 3 numbers. Student's work:

28, 29, 20

What did the student do wrong? Why do you think the student made this error?

After 29, the student wrote 20 instead of 30. The student reset the tens digit.

Solve the problem correctly. Show all of your work.

28, 29, 30

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Start at 45. Count on 5 numbers. Student's work:

46, 47, 48, 49, 40

What did the student do wrong? Why do you think the student made this error?

After 49, the student wrote 40 instead of 50. The student did not move to the next tens.

Solve the problem correctly. Show all of your work.

46, 47, 48, 49, 50

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Start at 79. Count on 3 numbers. Student's work:

70, 71, 72

What did the student do wrong? Why do you think the student made this error?

The student started at 70 instead of counting on from 79. The student should begin with the number after 79.

Solve the problem correctly. Show all of your work.

80, 81, 82

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Start at 16. Count on 2 numbers. Student's work:

15, 16

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student counted backward. Count on means count up from 16.	**17, 18**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Write the numeral for fourteen. Student's work:

41

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student reversed the digits. The 1 in the tens place should come first.	**14**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Write the numerals 11 to 15. Student's work:

11, 12, 13, 14, 51

What did the student do wrong? Why do you think the student made this error?

The student wrote 51 for fifteen. The student reversed the digits.

Solve the problem correctly. Show all of your work.

11, 12, 13, 14, 15

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Write the numeral for seventeen. Student's work:

70

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student wrote 70 and mixed up the digits. The 1 in 17 goes in the tens place.	**17**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Write the numeral for zero. Student's work:

1

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student wrote 1, which is one. Zero is written as 0.	**0**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Write the numerals 16, 17, and 18. Student's work:

16, 17, 81

What did the student do wrong? Why do you think the student made this error?

The student wrote 81 for eighteen. The digits were reversed.

Solve the problem correctly. Show all of your work.

16, 17, 18

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Write the numeral for twenty. Student's work:

2

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student wrote 2, which is two. Twenty needs a 0 after the 2.	**20**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count the 5 cubes. Student says: 'one, two, three, four, four, five.' Answer:

Student's answer: 5

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student said 'four' twice, so the count does not match one number per cube. The answer is right, but the count was not one-to-one.	**Count each cube once: one, two, three, four, five. There are 5 cubes.**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count the 7 blocks. Student says 'one' through 'seven' but touches one block twice. Answer:

Student's answer: 8

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student touched one block twice and counted an extra number. The last number said was seven.	**7 blocks**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count the 4 cups. Student says 'one, two, three, four.' Answer:

Student's answer: 3

What did the student do wrong? Why do you think the student made this error?

The student gave the number before the last count. The last number said is how many.

Solve the problem correctly. Show all of your work.

4

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count the 12 buttons. Student counts to twelve, then says:

Student's answer: 1

What did the student do wrong? Why do you think the student made this error?

The student said 1, not the last number counted. The total is the last number in the count.

Solve the problem correctly. Show all of your work.

12

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count the 6 pencils. Student counts to six, then says:

Student's answer: 5

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student said 5, which is the number before the last count. The total is six.	**6**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count the 9 counters. Student writes 19 as the total. Correct total:

Student's answer: 19

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added a 1 in front of the count. The count ended at nine, so there are 9 counters.	**9**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count the 8 dots, scattered. Student counts 'one' through 'eight' but skips one dot. Answer:

Student's answer: 7

What did the student do wrong? Why do you think the student made this error?

The student skipped one dot in a scattered arrangement. Touch each dot once to count all of them.

Solve the problem correctly. Show all of your work.

8

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count the squares in 3 rows of 4. Student counts 1, 2, 3, 4, then 5, 6, and says 6. Answer:

Student's answer: 6

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student stopped after two rows and did not count the third row.	**12**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count the 14 cars in a row. Student says 'one, two, ... twelve, fourteen.' Answer:

Student's answer: 14

What did the student do wrong? Why do you think the student made this error?

The student skipped thirteen in the count. The answer is right by luck, so the count needs to be fixed.

Solve the problem correctly. Show all of your work.

Say the numbers in order from one to fourteen. There are 14 cars.

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count the 6 scattered shells. Student says 'one' through 'seven.' Answer:

Student's answer: 7

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student counted one shell twice or added an extra number. There are only six shells.	**6**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count the 20 beads in a row. Student counts 'one' through 'nineteen.' Answer:

Student's answer: 19

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student stopped one bead early and did not count the last bead.	**20**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Count the 9 scattered coins. Student says 'one, two, three' and stops. Answer:

Student's answer: 3

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student stopped counting too early. All 9 coins must be counted.	**9**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Group A has 5 dots. Group B has 3 dots. Student's answer: 'Group A is less than Group B.'

Is Group A greater, less, or equal to Group B?

What did the student do wrong? Why do you think the student made this error?

The student reversed the comparison. Five is more than three, so Group A is greater.

Solve the problem correctly. Show all of your work.

Group A is greater than Group B (5 is greater than 3).

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Group A has 4 stars. Group B has 4 hearts. Student's answer: 'Not equal, the stars are bigger.'

Compare the number in each group.

What did the student do wrong? Why do you think the student made this error?

The student compared the size of the objects, not the number. Both groups have 4.

Solve the problem correctly. Show all of your work.

The groups are equal (4 and 4).

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Group A has 7 blocks. Group B has 9 blocks. Student's answer: 'Group A has more.'

Compare the number in each group.

What did the student do wrong? Why do you think the student made this error?

The student said Group A has more, but 7 is less than 9. Group B has more.

Solve the problem correctly. Show all of your work.

Group B has more (9 is greater than 7).

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Group A has 6 cubes. Group B has 8 cubes. Student's answer: 'They are equal.'

Compare the number in each group.

What did the student do wrong? Why do you think the student made this error?

The student did not compare the numbers. Eight is more than six, so the groups are not equal.

Solve the problem correctly. Show all of your work.

Group B has more (8 is greater than 6).

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Group A has 10 shells. Group B has 2 shells. Student's answer: 'Group B has more because 2 is bigger.'

Compare the number in each group.

What did the student do wrong? Why do you think the student made this error?

The student used the digit 2 without comparing the full numbers. Ten is greater than 2.

Solve the problem correctly. Show all of your work.

Group A has more (10 is greater than 2).

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Group A has 3 counters. Group B has 3 counters. Student's answer: 'Group B has one more.'

Compare the number in each group.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added one to Group B. Both groups have 3, so they are equal.	**The groups are equal (3 and 3).**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Which is greater, 4 or 7? Student's answer: '4 is greater.'

Compare 4 and 7.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student picked the smaller number. Seven is greater than four.	**7 is greater.**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Which is less, 6 or 2? Student's answer: '6 is less.'

Compare 6 and 2.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student picked the larger number. Two is less than six.	**2 is less.**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Compare 8 and 5 with a symbol. Student writes: 8 < 5

Compare 8 and 5.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student used the wrong symbol. Eight is greater than five.	**8 > 5**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Compare 3 and 3 with a symbol. Student writes: 3 > 3

Compare 3 and 3.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student used the greater-than symbol for equal numbers. Three equals three.	**3 = 3**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Compare 9 and 10. Student's answer: '9 is greater because 9 is bigger than 1.'

Compare 9 and 10.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student compared the 9 to the 1 in 10. Ten is greater because it has more than nine.	**10 is greater (10 > 9).**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Compare 1 and 7 with a symbol. Student writes: 1 > 7

Compare 1 and 7.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student thought 1 was bigger. Seven is greater, so the symbol should point toward 1 as the smaller number.	**1 < 7**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Show 2 + 3 with a drawing. Student draws 2 circles and 2 more circles. Answer:

Student's drawing has 4 circles.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student drew 2 and then 2 more instead of 3. The second group should have 3 circles.	**Draw 2 circles and 3 circles. Together that is 5.**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Write an equation for: 'There were 4 birds. Then 1 bird flew away.' Student writes: 4 + 1 = 5

Equation for the story:

What did the student do wrong? Why do you think the student made this error?

The student used addition for a take-away story. When a bird flies away, the number goes down.

Solve the problem correctly. Show all of your work.

4 - 1 = 3

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Write an equation for: 'I have 3 apples and get 2 more.' Student writes: 3 - 2 = 1

Equation for the story:

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student subtracted. Getting more apples means adding.	**3 + 2 = 5**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Show 5 - 2 with cubes. Student says: 'I took away 3 cubes and 2 are left.' Answer: 2

Student's answer: 2

What did the student do wrong? Why do you think the student made this error?

The student took away 3 cubes, but the problem says take away 2. The answer 2 is not correct for this problem.

Solve the problem correctly. Show all of your work.

Take away 2 cubes. 3 are left, so 5 - 2 = 3.

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Write an equation for: 'Mia has 6 pencils and gives away 1.' Student writes: 6 + 1 = 7

Equation for the story:

What did the student do wrong? Why do you think the student made this error?

The student added. Giving pencils away means subtracting.

Solve the problem correctly. Show all of your work.

6 - 1 = 5

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Act out 1 + 4. Student says: 'one, then four more is 4.' Answer: 4

Student's answer: 4

What did the student do wrong? Why do you think the student made this error?

The student forgot to include the first 1. Four more plus the first one makes 5.

Solve the problem correctly. Show all of your work.

1 + 4 = 5

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

There are 4 ducks. 3 more come. How many ducks now? Student's answer: 1

Solve the word problem.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student subtracted, but more ducks came, so we add.	**7 ducks (4 + 3 = 7)**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

There are 6 cookies. 2 are eaten. How many cookies are left? Student's answer: 8

Solve the word problem.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added, but cookies were eaten, so we take away.	**4 cookies (6 - 2 = 4)**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

There are 5 kids on the bus. 2 get on. How many kids now? Student's answer: 3

Solve the word problem.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student subtracted, but kids got on the bus, so we add.	**7 kids (5 + 2 = 7)**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

There were 8 fish. 3 swam away. How many fish remain? Student's answer: 11

Solve the word problem.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added, but fish swam away, so we take away.	**5 fish (8 - 3 = 5)**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

There are 3 red balloons and 4 blue balloons. How many balloons in all? Student's answer: 1

Solve the word problem.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student subtracted, but the problem asks for all balloons together, so we add.	**7 balloons (3 + 4 = 7)**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

7 birds sat on a fence. 1 flew away. How many birds are left? Student's answer: 7

Solve the word problem.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student did not take away the bird that flew away. One bird left, so we subtract.	**6 birds (7 - 1 = 6)**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Show 5 in two parts. Student's answer: 2 and 2

Break 5 into two parts.

What did the student do wrong? Why do you think the student made this error?

The two parts add up to 4, not 5. The parts must add up to the whole.

Solve the problem correctly. Show all of your work.

2 and 3 (or 1 and 4)

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Decompose 7. Student's answer: 3, 4, and 1

Break 7 into two parts.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student used three parts. The problem asks for two parts, and the parts must add up to 7.	**3 and 4 (or 2 and 5)**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Decompose 6. Student's answer: 4 and 1

Break 6 into two parts.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The parts add up to 5, not 6.	**4 and 2 (or 3 and 3)**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Decompose 9. Student's answer: 5 and 5

Break 9 into two parts.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Five and five make 10, not 9.	**5 and 4**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Decompose 10 into two parts. Student's answer: 6 and 3

Break 10 into two parts.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Six and three make 9, not 10.	**6 and 4 (or 7 and 3)**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Decompose 4. Student's answer: 2 + 3

Break 4 into two parts.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Two and three make 5, not 4.	**2 and 2 (or 1 and 3)**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

What number adds to 3 to make 10? Student's answer: 6

3 + ? = 10

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Three plus six is 9, not 10.	**7 (3 + 7 = 10)**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

What number adds to 8 to make 10? Student's answer: 3

8 + ? = 10

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Eight plus three is 11, which is too many.	**2 (8 + 2 = 10)**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

What number adds to 5 to make 10? Student's answer: 4

5 + ? = 10

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Five plus four is 9, not 10.	**5 (5 + 5 = 10)**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

What number adds to 1 to make 10? Student's answer: 8

1 + ? = 10

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
One plus eight is 9, not 10.	**9 (1 + 9 = 10)**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

What number adds to 7 to make 10? Student's answer: 2

7 + ? = 10

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Seven plus two is 9, not 10.	**3 (7 + 3 = 10)**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

What number adds to 4 to make 10? Student's answer: 5

4 + ? = 10

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Four plus five is 9, not 10.	**6 (4 + 6 = 10)**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

2 + 2 = ? Student's answer: 5

Add within 5.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student gave a total that is too big. Two and two make 4.	**4**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

5 - 1 = ? Student's answer: 6

Subtract within 5.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student added instead of subtracting. Taking 1 away from 5 leaves 4.	**4**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

3 + 1 = ? Student's answer: 2

Add within 5.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student gave a total that is too small. Three plus one is four.	**4**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

4 - 3 = ? Student's answer: 3

Subtract within 5.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student subtracted 0 instead of 3. Four take away three leaves 1.	**1**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

1 + 4 = ? Student's answer: 6

Add within 5.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student counted one extra. One plus four is five.	**5**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

5 - 4 = ? Student's answer: 4

Subtract within 5.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student did not subtract. Five take away four leaves 1.	**1**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Write 14 as tens and ones. Student's answer: 4 tens and 1 one

14 = ? tens and ? ones

What did the student do wrong? Why do you think the student made this error?

The student swapped the tens and the ones. Fourteen has 1 ten and 4 ones.

Solve the problem correctly. Show all of your work.

1 ten and 4 ones

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Write 12 as tens and ones. Student's answer: 2 tens and 1 one

12 = ? tens and ? ones

What did the student do wrong? Why do you think the student made this error?

The student swapped the tens and the ones. Twelve has 1 ten and 2 ones.

Solve the problem correctly. Show all of your work.

1 ten and 2 ones

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Write 19 as tens and ones. Student's answer: 1 ten and 8 ones

19 = ? tens and ? ones

What did the student do wrong? Why do you think the student made this error?

The student wrote 18. Nineteen has 1 ten and 9 ones.

Solve the problem correctly. Show all of your work.

1 ten and 9 ones

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

A full ten frame and 6 more dots. Student's answer: 16 = 6 tens and 1 one

How many tens and ones in 16?

What did the student do wrong? Why do you think the student made this error?

The student swapped the tens and ones. The full ten frame is 1 ten, and 6 more dots are 6 ones.

Solve the problem correctly. Show all of your work.

1 ten and 6 ones

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Write 13 as tens and ones. Student writes: 103

13 = ? tens and ? ones

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student wrote the ten as three digits. Thirteen is 1 ten and 3 ones.	**1 ten and 3 ones**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Write 11 as tens and ones. Student's answer: 1 ten and 0 ones

11 = ? tens and ? ones

What did the student do wrong? Why do you think the student made this error?

The student left out the ones. Eleven is 1 ten and 1 one.

Solve the problem correctly. Show all of your work.

1 ten and 1 one

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Describe a pencil with a measurable attribute. Student's answer: 'It is pretty.'

Name a measurable attribute.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Pretty is an opinion, not a measurement. Length can be measured.	**It is long or short.**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Describe a bag of sand. Student's answer: 'It is heavy and blue.'

Name a measurable attribute.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Blue is a color, not a measurement. Heavy is a measurable attribute (weight).	**It is heavy or light.**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Describe a desk. Student's answer: 'It is fun to sit at.'

Name a measurable attribute.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Fun is not measurable. Length, height, and weight can be measured.	**It is tall, wide, or heavy.**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Describe a feather. Student's answer: 'It is heavy.'

Name a measurable attribute.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A feather is light. Heavy is the wrong measure for a feather.	**It is light.**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Describe a crayon. Student's answer: 'It is red and smooth.'

Name a measurable attribute.

What did the student do wrong? Why do you think the student made this error?

Red and smooth are not measurable attributes in this standard. Length is measurable.

Solve the problem correctly. Show all of your work.

It is long or short.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Describe a rock. Student's answer: 'It is strong.'

Name a measurable attribute.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Strong is not a measurable attribute. Weight is measurable.	**It is heavy or light.**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Pencil A is longer than Pencil B. Student's answer: 'Pencil B is longer.'

Which pencil is longer?

What did the student do wrong? Why do you think the student made this error?

The student reversed the comparison. Pencil A is the longer one.

Solve the problem correctly. Show all of your work.

Pencil A is longer.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Which box is heavier, the small box or the big box? Student's answer: 'The small box is heavier.'

Which box is heavier?

What did the student do wrong? Why do you think the student made this error?

The student judged by size, not weight. A small box can be heavier than a big one.

Solve the problem correctly. Show all of your work.

Check by holding both. Size alone does not tell weight.

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Which is taller, the tall book or the short book? Student's answer: 'The tall book is shorter.'

Which book is taller?

What did the student do wrong? Why do you think the student made this error?

The student reversed the comparison. The tall book is taller.

Solve the problem correctly. Show all of your work.

The tall book is taller.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Which is lighter, a ball or a block? Student's answer: 'The block, because it is bigger.'

Which is lighter?

What did the student do wrong? Why do you think the student made this error?

The student judged by size. Compare weight directly, not size.

Solve the problem correctly. Show all of your work.

Hold each one. Weight must be compared directly.

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

String A is 3 inches. String B is 5 inches. Student's answer: 'They are the same.'

Which string is longer?

What did the student do wrong? Why do you think the student made this error?

The student did not compare the lengths. Five inches is longer than three inches.

Solve the problem correctly. Show all of your work.

String B is longer.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Crayon 1 and Crayon 2 are not lined up. Student's answer: 'Crayon 1 is longer.'

Which crayon is longer?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The crayons did not start at the same place. To compare length directly, line them up at the same end.	**Line them up at the same end, then compare.**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Sort 6 fruits: 3 apples, 2 bananas, 1 orange. Student's count: apples 3, bananas 2, oranges 3.

Count each group.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student counted the oranges wrong. There is 1 orange.	**Apples 3, bananas 2, oranges 1**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Sort shapes: 4 circles and 3 squares. Student puts 1 circle with the squares.

Sort the shapes into groups.

What did the student do wrong? Why do you think the student made this error?

The student put a circle in the square group. The groups must match the shape names.

Solve the problem correctly. Show all of your work.

Circles: 4. Squares: 3.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Sort animals: 4 cats and 2 dogs. Student's answer: 'There are 6 cats.'

How many cats?

What did the student do wrong? Why do you think the student made this error?

The student counted all animals instead of only the cats. The total of 6 includes the dogs.

Solve the problem correctly. Show all of your work.

4 cats and 2 dogs

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Sort blocks by color: 5 red and 3 blue. Student's answer: 'There are 8 red.'

How many red blocks?

What did the student do wrong? Why do you think the student made this error?

The student added the blue blocks to the red count. Only the red blocks should be counted.

Solve the problem correctly. Show all of your work.

5 red blocks

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Sort socks: 2 striped and 2 plain. Student's count: striped 3, plain 2.

Count each group.

What did the student do wrong? Why do you think the student made this error?

The student counted the striped socks wrong. There are 2 striped socks.

Solve the problem correctly. Show all of your work.

Striped 2, plain 2

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Sort toys: 4 soft and 3 hard. Student's count: soft 3, hard 4.

Count each group.

What did the student do wrong? Why do you think the student made this error?

The student swapped the counts. There are 4 soft toys and 3 hard toys.

Solve the problem correctly. Show all of your work.

Soft 4, hard 3

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Describe a ball using a shape name. Student's answer: 'a square'

Name the shape.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A ball is round and not square. The shape name for a ball is sphere.	**sphere**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Describe a door using a shape name. Student's answer: 'a circle'

Name the shape.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A door has four sides and corners. It is a rectangle.	**rectangle**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Describe a clock face using a shape name. Student's answer: 'a triangle'

Name the shape.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A clock face is round with no corners. It is a circle.	**circle**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Describe a box of cereal using a shape name. Student's answer: 'a cylinder'

Name the shape.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A cereal box has flat faces and square corners. It is a rectangular prism.	**rectangular prism**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Describe a house roof using a shape name. Student's answer: 'a circle'

Name the shape.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A roof has three sides. It is a triangle.	**triangle**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Describe a can of soup using a shape name. Student's answer: 'a cube'

Name the shape.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A can is round on top and has a round bottom. It is a cylinder.	**cylinder**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

A triangle is turned upside down. Student's answer: 'That is not a triangle.'

Name the shape.

What did the student do wrong? Why do you think the student made this error?

Turning a shape does not change its name. It still has 3 sides and 3 corners.

Solve the problem correctly. Show all of your work.

It is a triangle.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

A big square and a small square. Student's answer: 'The big one is a rectangle.'

Name the shape.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Size does not change the name. A big square still has 4 equal sides.	**It is a square.**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

A square turned like a diamond. Student's answer: 'It is a diamond, not a square.'

Name the shape.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Turning a square does not change its name. It still has 4 equal sides.	**It is a square.**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

A long, skinny rectangle. Student's answer: 'It is a line.'

Name the shape.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A line has no corners. This shape has 4 corners and 4 sides.	**It is a rectangle.**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

A circle drawn very large. Student's answer: 'It is an oval.'

Name the shape.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Size does not change the name. All points on the shape are the same distance from the center.	**It is a circle.**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

A triangle with one side slanted. Student's answer: 'It is a square.'

Name the shape.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The shape has 3 sides and 3 corners, so it is a triangle.	**It is a triangle.**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Is a ball 2D or 3D? Student's answer: 2D

Is it 2D or 3D?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A ball has depth, so it is a solid shape. It is 3D.	**3D**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Is a circle drawn on paper 2D or 3D? Student's answer: 3D

Is it 2D or 3D?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A drawn circle is flat and has no depth. It is 2D.	**2D**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Is a cube 2D or 3D? Student's answer: 2D because it has squares.

Is it 2D or 3D?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The squares are its faces, but the cube has depth. It is 3D.	**3D**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Is a square drawn on paper 2D or 3D? Student's answer: 3D because it has 4 sides.

Is it 2D or 3D?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Having 4 sides does not make a shape 3D. A drawn square is flat, so it is 2D.	**2D**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Is a cone 2D or 3D? Student's answer: 2D because it has a point.

Is it 2D or 3D?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A cone has depth and is a solid shape. It is 3D.	**3D**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Is a triangle drawn on paper 2D or 3D? Student's answer: 3D

Is it 2D or 3D?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A drawn triangle is flat. It is 2D.	**2D**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Compare a square and a rectangle. Student's answer: 'Both have 4 equal sides.'

How are they alike and different?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A rectangle has two pairs of equal sides, not four equal sides. Only a square has four equal sides.	**A square has 4 equal sides. A rectangle has 2 pairs of equal sides.**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

How many corners does a triangle have? Student's answer: 4

Count the corners.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student counted an extra corner. A triangle has 3 corners.	**3**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Compare a cube and a sphere. Student's answer: 'Both have flat faces.'

How are they alike and different?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A sphere is round and has no flat faces. Only the cube has flat faces.	**A cube has flat faces. A sphere is round with no flat faces.**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

How many sides does a hexagon have? Student's answer: 5

Count the sides.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student missed one side. A hexagon has 6 sides.	**6**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Compare a circle and a square. Student's answer: 'Both have corners.'

How are they alike and different?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A circle has no corners. A square has 4 corners.	**A square has corners. A circle does not.**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Describe a cube. Student's answer: 'It has no flat sides.'

Describe the cube.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
A cube has 6 flat square faces, so the student's description is wrong.	**A cube has 6 flat square faces.**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Make a square with straws. Student uses 3 straws.

How many straws do you need?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Three straws do not close into a square. A square has 4 sides.	**4 straws**

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Draw a triangle. Student draws a shape with 4 sides.

Draw the shape.

What did the student do wrong? Why do you think the student made this error?

The student drew a four-sided shape. A triangle has 3 sides.

Solve the problem correctly. Show all of your work.

Draw a shape with 3 straight sides.

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Draw a circle. Student draws a square with rounded corners.

Draw the shape.

What did the student do wrong? Why do you think the student made this error?

The shape still has corners. A circle is round with no corners.

Solve the problem correctly. Show all of your work.

Draw a round shape with no corners.

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Make a cube out of squares. Student uses 5 squares.

How many squares do you need?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student is missing one face. A cube has 6 square faces.	**6 squares**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Build a triangle with sticks. Student uses 4 sticks.

How many sticks do you need?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Four sticks make a four-sided shape. A triangle needs 3 sticks.	**3 sticks**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Draw a square. Student draws a long shape with 4 unequal sides.

Draw the shape.

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The sides are not equal. A square has 4 equal sides.	**Draw 4 equal sides with 4 corners.**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Put 2 identical triangles together to make a bigger shape. Student's answer: 'A circle.'

What shape do you make?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Two triangles put together have straight sides, so they cannot make a circle.	**A larger triangle or a rectangle, depending on how they fit.**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Use 4 small squares to make a bigger square. Student's answer: 'A rectangle with 3 squares.'

Make a bigger square.

What did the student do wrong? Why do you think the student made this error?

Three squares do not make a square. The student used 3 squares, not 4.

Solve the problem correctly. Show all of your work.

Arrange the 4 squares in 2 rows of 2 to make a bigger square.

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Put 2 rectangles side by side. Student's answer: 'A triangle.'

What shape do you make?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
Two rectangles side by side make a bigger rectangle, not a triangle.	**A bigger rectangle.**

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Use 2 squares to make a shape. Student's answer: 'A triangle.'

What shape do you make?

What did the student do wrong? Why do you think the student made this error?

Two squares side by side make a rectangle. They cannot make a triangle.

Solve the problem correctly. Show all of your work.

A rectangle.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Use 3 squares to make a square. Student's answer: 'Yes, 3 squares make a square.'

Can you make a square?

What did the student do wrong? Why do you think the student made this error?

Three squares in a row make a rectangle. A square needs 4 squares in 2 rows of 2.

Solve the problem correctly. Show all of your work.

No. Three squares in a row make a rectangle.

Original task. Format inspired by error analysis routines.

Find the Error

Name: Answer Key Date: _____

Directions: Analyze the student's work shown below. Identify the error. Then correctly solve the problem.

Make a shape using 2 of the same triangles. Student uses 1 triangle and calls it 'a bigger triangle.'

How many triangles did you use?

What did the student do wrong? Why do you think the student made this error?	Solve the problem correctly. Show all of your work.
The student used 1 triangle. The task asks for 2 triangles.	**Use 2 triangles and put them together.**

Original task. Format inspired by error analysis routines.
